

# Get Global...

## And Get The Good Looks You Want From An Automotive Window Film

Whether you drive a luxury sedan, SUV, sports car, truck or family van, your vehicle is a reflection of you. So you want to keep it looking good. It's also a major investment and Global window film is the smart way to protect its value while enhancing its appearance.

As specialists in automotive window films for more than 25 years, Global knows what you want: a window film that will add to the beauty of your vehicle, protect its interior and improve your comfort and safety. And we have the expertise to deliver just that.

## Choose The Global Film That's Right For Your Lifestyle

Because every vehicle and its owner are different, Global offers a full line of automotive window films designed to provide the custom look you desire no matter what vehicle you drive. From high-performance metallized films to standard non-reflective films that are ideal for vehicles with embedded antennas, cellular and GPS systems, you'll find a Global film with the features to match your individual preferences.

Choose from films in all the most popular colors to blend beautifully with every exterior, in Visible Light Transmission (VLT) options to meet compliance regulations for any state or local laws. Whatever Global product you select, you are assured that it is professional grade and backed by the strong Global warranty - one of the best in the industry.

## Discover The Benefits Of Automotive Window Film

With Global window film installed on your vehicle, you'll enjoy all the advantages that only the highest quality window film can provide. Advantages such as:

### Enhanced Appearance

Global window films add a touch of class to every vehicle.

### Greater Comfort

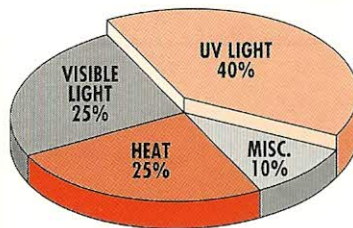

Global window films offer daytime heat rejection to make your vehicle more comfortable and help your cooling system work more efficiently.

### Better Visibility & Less Glare

Global window films provide low inside and outside reflectivity for better night visibility and less daytime glare, to make driving easier on the eyes.

### Reduced Fading\*

By rejecting almost all damaging ultraviolet (UV) rays, Global window films can help protect your vehicle's fabric or leather interior from sun fading and deterioration.

*\* Although Global window films block out almost 100% of harmful and damaging ultraviolet, it is important to understand that no window film can totally prevent or stop fading.*

### Unchanging Beauty

Global window films offer high color stability and select films are guaranteed to not fade to purple.

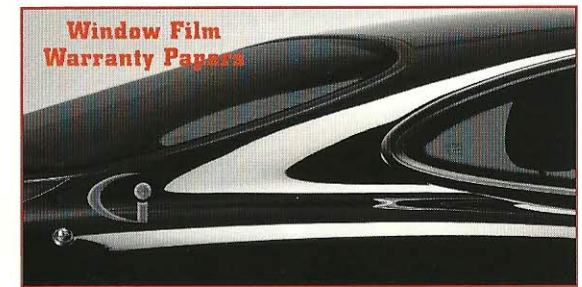

### Increased Safety

Although Global automotive window films won't prevent glass breakage they can help hold shattered glass together in case of an accident or vandalism, to help protect you and your passengers from possible injury. And all Global window films block out almost 100% of harmful ultraviolet, which has been determined to be a leading cause of skin cancer.

### More Privacy

Depending on your preference, select Global window films can make the inside of your vehicle more private while others are almost invisible once installed. Product selections are available in Visible Light Transmissions (VLT) ranging from 5% to 70%.

## Warranty Coverage

No matter what Global window film product you select, you are assured that it is professional grade and backed by the strong Global warranty - one of the best in the industry.

## Technology For Unsurpassed Quality

Behind every Global window film product is the most advanced technology in the industry. Because all Global films are manufactured at our own state-of-the-art facilities we can ensure complete quality control at every stage of production, from raw materials to the finished products. We use only the finest materials and the latest technologies to create window films that set the industry standard for quality and dependability.

## Automotive Window Films Are Just The Beginning

Building on our success in serving the automotive industry, Global offers a comprehensive range of architectural window films for residential, commercial applications including solar control, safety & security and specialty options. Like our automotive window films, Global solar control, safety and specialty window films deliver the performance you want in every environment and are backed by the comprehensive Global warranty. Ask your dealer or the area Global distributor about these professional quality products designed to provide effective window film solutions for home and business.

## Your Global Dealer Gives You The Professional Edge

Global window film products are installed only by professional window film dealers who must meet high standards for experience and skill. They are experts in helping you select the film that is right for you and their years of experience insure a professional, hassle free installation. Professional dealers and professional grade products: it's the Global combination that delivers added value to your vehicle - and your life.
